PERFORMANCE SEATS

SENSE THE DYNAMICS.
ENJOY THE DRIVE.

The sports-oriented seats from RECARO.

BODY SUPPORT FOR UNIQUE DRIVE PERFORMANCE.

Have you ever tested a RECARO seat? Then you will know how good it feels. It envelops your body like a second skin. It fits like a glove. And you feel like you are sitting IN the seat and not ON it. This is what all RECARO models have in common. We call it Body Support.

With a RECARO seat at the interface between man and machine, the road becomes a playground that constantly gives the driver immediate feedback. It boasts a low center of gravity, firm and compact upholstery, and the necessary freedom of movement for the arms. It helps you keep control in the corners and truly enjoy the experience of driving.

Thanks to its close-fitting, supportive seat structure and side bolsters for excellent shoulder and torso support, it keeps the body stable against lateral forces and surrounds it like a second skin. You will notice the difference.

“The RECARO seat not only gives me the safety I need in the race car, but also a certain degree of comfort and full support for my entire body so that I can do my best behind the wheel.”
